19 January 1970

MEMORANDUM FOR THE RECORD:

SUBJECT: Conducted Tour of Printing Services Building

REF : Headquarters Employees Bulletin #226, dtd 31 Dec 69,
same subject

1. During the 45 minute tour of the Printing Services Building, 14 January 1970, a statement was made that there has been very little improvement in the printing equipment in the last 50 years; however, some advances were expected.

2. On contacting [REDACTED] at a later date (19 January 1970) he said that due to an electronic breakthrough, the present line-o-type may be obsolete in about five years. The future replacement would be a photo-composition which a page could be completed in seconds. The new equipment would occupy less space and be less bulky. At the moment [REDACTED] is working very closely with OCS in the use of computers that will have a close relationship to the photo-composer in the future.
